Jackmox-CLB 625

Amoxicillin 500 mg + Potassium Clavulanate 125 mg with lactic acid bacillus Tablets

- ☉ Highly effective against resistant pathogens unlike cephalosporins.
- ☉ Effective against gram(-)ve pathogens like E-Coli, enterobacter species.
- ☉ Studies have demonstrated the efficacy of complicated and uncomplicated simple & recurrent UTI.

Indication :

- Community Acquired Pneumonia
- Intra-abdominal Infections
- Skin & Soft Tissue Infections
- Urinary Tract Infections
- Chronic Bronchitis
- Surgical Prophylaxis

Well Tolerated & Safe world wide acceptance & usage.

*An Ideal Antibiotic
for Little Ones*

Jackmox-CL

Amoxicillin 200 mg + Potassium Clavulanate 28.5 mg **Dry Syrup**

AMOXYCILLIN :

- Semi-synthetic penicillin (beta-lactam antibiotics)
- Inhibits one or more enzymes.
- Peptidoglycan is an integral structural component of the bacterial cell wall that inhibit by the Amoxycillin.

CLAVULANATE POTASSIUM :

- It is beta-lactam structurally related to penicillin.
- Inactives some beta-lactmase enzymes thereby preventing inactivation of Amoxycillin.

*** Upper Respiratory Tract Infections**

*** Lower Respiratory Tract Infections**

*** Urinary Tract Infections**

*** Skin & Soft Tissue Infections**

*** Dental Infections**

The Antibiotic with Efficacy & Safety

**Step Towards
Freedom
from Infections**

Flexim-200

Cefixime 200 mg **Tablets**

- Possesses excellent efficacy against a broad spectrum of pathogens, including Haemophilus influenzae, Streptococcus pneumoniae and Moraxella catarrhalis
- Highly stable in the presence of beta-lactamase enzymes
- Possesses long half life leading to high patient compliance
- Prime choice for switch therapy owing to its very good efficacy and safety profile
- Superior to Cefaclor in curing acute otitis media

Indication

Typhoid Fever

Chronic Bronchitis

UTI

Acute Otitis Media

Effectively fight Infections

Protect your little star with...

Flexim

Cefixime 50 mg Dry syrup

- ▶ Used successfully in the treatment of many serious infection.
- ▶ Provides shortening hospital stay and reducing nosocomial bacteremia
- ▶ 5 day treatment of bacterial pharyngitis and tonsillitis with cefixime was as effective as a ten day treatment with penicillin V
- ▶ Cefixime remains a useful treatment option for respiratory tract infections, Including in areas with increasing resistance problems

Otitis media

Sinusitis

Pharyngitis

**Community-acquired
Pneumonia**

Safe as per as effective treatment

FAST CONTROL

of Polymicrobial Infections

Jack-SB

Ceftriaxone 1000 mg + Sulbactam 500 mg Injection

- Ceftriaxone is more effective than gentamicin /metronidazole prophylaxis in reducing wound & urinary tract infections after bowel operations
- Sulbactam inhibited the beta-lactamase degradation of ceftriaxone & enhanced the killing by ceftriaxone
- Sulbactam & Ceftriaxone are of similar prophylactic efficacy in the prevention of surgical-site infections after neurosurgery
- Clinical & bacteriological response was satisfactory in 100 % of Sulbactam- treated patients & in 93% of the ceftriaxone-treated patient for treatment of soft tissue & skeletal infections in children

In

- **Typhoid Fever**
- **Meningitis**
- **Bacteremia**
- **Pneumonia**
- **Septicemia**
- **UTIs**

Fire

Let **Rabejee-DSR** cease the fire

Rabejee-DSR

Rabeprazole Sodium (EC) 20mg & Domperidone (SR) 30mg Capsules

RABEPRAZOLE

Potent inhibitor of gastric acid secretions & considered as the best PPI

DOMPERIDONE

Eliminates the nausea and vomiting associated With GERD

Reduction in frequency of administration of drug so better dosage compliance, it has to be given O.D. maintainance of therapeutic effect overnight

Indication :

- **Dyspepsia**
- **Chronic Gastritis**
- **Gastroesophageal Reflux Disease**
- **Post-operative Nausea & Vomiting**

Also Available :

Rabejee-20

Rabeprazole Sodium 20mg Tablets

Fireman inside your belly

Congestion free life,
made possible with

Jimi-Cold

Paracetamol 250 mg + Phenylephrine HCL 5 mg
+ CPM 2 mg & Sodium Citrate 60 mg **Suspension**

Total Relief In Cold & Fever

- **Paracetamol** Produces analgesia by elevation of the pain threshold and antipyretic effect through action on the hypothalamic heat-regulating center.
- **Phenylephrine** as a sympathomimetic decongestant reduces the nasal congestion due to increased nasal blood flow associated with colds and influenza.
- **Sodium Citrate** is a mucolytic agent (cough/sputum thinner) that works by thinning and loosening phlegm (mucus) in lungs, windpipe and nose.
- **Chlorpheniramin** used in the prevention of the symptoms of allergic condition.

Indication :

Sinus/Nasal Congestion

Upper Respiratory Allergies

Cold, Allergies & Hay Fever

Seasonal Allergic Rhinitis

Jimi-Cold *Drill the cold out....*

Jklifescience

To Meet the Challenge
of **Cough & Cold**

Jee Cold

Paracetamol 500 mg + Phenylephrine 5mg +
Chlorpheniramine 2 mg + Caffeine 30 mg **Tablets**

PARACETAMOL :

- Safe and effective analgesic and antipyretic in several cold conditions

CHLORPHENIRAMINE MALEATE :

- Competitively antagonizes histamine at H₁ receptor sites
- Controls sneezing, running nose and itchy eyes

PHENYLEPHRINE HCL :

- An alpha-adrenergic receptor agonist used primarily as a nasal decongestant.
- Relieves sinus congestion and pressure.

CAFFEINE :

- Caffeine is a xanthine alkaloid & a stimulant drug shows effects within 15 min after ingestion

Indication :

- ▣ Fever along with body pain
- ▣ Nasal allergy with congestion
- ▣ Seasonal allergic rhinitis
- ▣ Common cold
- ▣ Mucus Cough

Total Relief in **COLD & FEVER**
